Need a Last-Minute Gift Idea for a Relative, Friend, or Business Associate?

The Seventh Edition of the *Handbook of Nonprescription Drugs* may be the answer.

For 15 years, pharmacists, physicians, and other health care professionals have been turning to APhA's *Handbook* for valuable, practical health care information. No wonder it has earned a reputation as the most comprehensive reference book in its field—a classic you'll want to keep within arm's reach.

The new Seventh Edition of the *Handbook* has proved to be a best-seller. And no wonder. The 8½ x 11-inch, 722-page book has been totally updated. All the chapters have been rewritten. New chapters have been added. More than 100 pages of up-to-date tables provide at-a-glance product information on frequently used nonprescription drug products. In addition, it is visually beautiful.

The *Handbook* would be an ideal gift for a physician, a medical or pharmacy student, your local hospital or library, or some other interested individual in your family or community.
